	Examiner Robert S. Tupper	Art Unit 2652	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 6) ☐ Other: _____

1. Applicant's election without traverse of the species of figure 1A, stating claims 1 and 2 to be readable thereon, in the reply filed on 4/5/05 is acknowledged.
2. Claims 3-6 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/5/05.
3. The approval of the drawings is hereby withdrawn.

Figure 12 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by KITA (5,199,593).

Note figures 1 and 2. KITA discloses a disk cartridge (see column 1 lines 15-21 which state the cartridge can be a magnetic disk cartridge) having upper and lower shells (2,3) assembled by mechanically engaging protrusions (28) and grooves (27) along the circumferential edges of the shells.

These claims do not preclude welding. The recitation of "circumferential edge portions" reads on structures located on the facing edges of the shells as shown in KITA.

6. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by SANDELL et al (4,945,530).

Note figure 22a. SANDELL et al discloses a disk cartridge having upper and lower shells (53d,54d) assembled by mechanically engaging protrusions (172) and grooves (171) along the circumferential edges of the shells.

SANDELL et al does not use welding. The recitation of "circumferential edge portions" reads on structures located on the facing edges of the shells as shown in SANDELL et al.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation in claim 1 (line 7) "circumferential edge portions" is indefinite, misleading, and misdescriptive with relation to the species of figures 1A – 1C. The drawings and specification clearly show that the groove and protrusion are located in the middle of the side walls of the shells.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert S. Tupper whose telephone number is 571-272-7581. The examiner can normally be reached on Mon - Fri, 6:30 AM - 4:00 PM (first Fri off).
